Jackson's California Grown Zinnias

Dahlia-Flowered Zinnias

In 1924 The Royal Horticultural Society of England granted an "AWARD OF MERIT" for the strain, and a "GOLD MEDAL" for the group of DAHLIA-FLOWERED ZINNIAS exhibited in London, by the grower of the strains of Zinnias that we handle. The Dahlia-Flowered Zinnia is the latest thing in the Zinnia line and is undoubtedly the most handsome one that has been propagated so far by any grower. They are exceptionally large and the many shades and colors in which they come make them simply indescribable.

EXQUISITE. By far the most pleasing of our collection. Truly dahlia-flowered as regards form and size; color a beautiful light rose with a deep rose center.

GOLDEN STATE. A very rich orange, yellow in the bud turning to an attractive orange when in full bloom.

SCARLET FLAME. A large, beautiful bright scarlet with a delightful blending of orange throughout the petals.

LEMON BEAUTY. A beautiful new shade, a somewhat golden yellow on brown; should be in every collection.

DREAM. A fine, deep lavender, turning to a purple (mellow purple), a new and very desirable shade in the Zinnia line.

PURPLE PRINCE. A fine deep purple, large and well formed; this is a new one and very pretty.

POLAR BEAR. A very large, pure white, true dahlia form and the best white in a Zinnia.

BUTTERCUP. An immense deep creamy yellow, which is very beautiful and should be in every collection.

CRIMSON MONARCH. By far the largest and best of the red shades. Flowers often 8 inches in diameter. Plant very vigorous.

SPECIAL MIXTURE. Contains all of the above named Dahlia-flowered Zinnias and others that we do not list; this mixture is made especially for us by our grower.

Price of all above Dahlia-flowered Zinnias: Pkt. 20c; 3 pkts. 50c; ½ oz. \$1.00; oz. \$2.00, postpaid.

You can plant Zinnias in March, April, May, June, July, August, September and sometimes in October.

Zinnias—California Giants

Lilliput Zinnias or Dwarf Double

The Lilliput Double Zinnias are a new introduction and have justly gained in popularity until now they are being used in solid masses in esplanades on boulevards. The River Oaks addition here at Houston planted their esplanades throughout the addition with our Lilliput Zinnias and created a sensation. The flowers, as the name would indicate, are small and very double, growing on a dwarf bush and can be used to good advantage as borders or in solid beds. They are new, beautiful and something different in Zinnias. They are to be obtained in the following shades:

CANARY-YELLOW **GOLDEN GEM** **WHITE GEM**
SCARLET GEM **CRIMSON GEM**
SALMON-ROSE **PURPLE**

SPECIAL MIXTURE. Containing all of the above shades.

Price of Lilliput Zinnias: Pkt. 10c; 6 Pkts. 50c; ½ oz. 80c; oz. \$1.50, postpaid.

Lilliput or Tom Thumb Mixture

This is the smallest bedding type of small dwarf Zinnias. The plants usually grow from 4 to 6 inches high, very compact and covered with well formed flowers of the lilliput type. Colors range through the red, orange, yellow, pink, rose and other pastel shades. Pkt., 10c; 3 pkts., 25c; ½ oz., 80c; oz., \$1.50, postpaid.

Jackson's California Giant Zinnia

This is an improved Giant Double Zinnia, that often measures six inches across the surface; we have them in the following shades:

LIGHT FLESH or
BLUISH PINK
PURPLE SCARLET
CRIMSON
DEEP SALMON-ROSE
LIGHT YELLOW
GOLDEN YELLOW
WHITE

SPECIAL MIXTURE. This mixture contains all of the above colors and shades and many others.

Price of Giant Zinnias: Pkt. 10c; 6 pkts. 50c; ½ oz. 80c; oz. \$1.50, postpaid.

Quilled Zinnias

This is simply a beautiful type and stands out all alone. Each petal of this beautiful Zinnia is peculiarly quilled and twisted. The various shades of rose and lilac, when the petals twist, reflect very pleasing colors.

Pkt. 25c.

Picotee Zinnias

A distinct novelty in the Zinnia line, not quite as large as the Double Giants, but extremely beautiful and graceful in appearance, as the edges of the petals are all well marked with a different color than the body of the flower. The seed does not all produce a true Picotee flower, not more than 60 per cent, but those that do not come true are exquisite. All colors mixed, including a new shade. Pkt. 25c; 5 pkts. for \$1.00.

Plant Zinnias

Plant as late as September and they will bloom until frost. We have specialized in Zinnias for the past five years and our selected strains of Giant Zinnias, Dahlia-Flowered and Picotee Zinnias have met with such success that we know what we offer in the Zinnia line is the best that money can buy. Nothing that you can plant will beautify and brighten up your garden more than Zinnias; they are easy to grow, but one thing must be borne in mind, that is not to plant them until the ground is warm, as Zinnias checked in their growth while young never amount to very much. Try a box of STIM-U-PLANT fertilizer on your Zinnias. Price, 25c.

AGERATUM

JACKSON'S BLUE BALL AGERATUM. This is by far the best all round dwarf Ageratum yet produced, growing about 4 inches high, the plants being tiny mounds of flowers, which are large and compact and of a deep rich blue. The foliage is small and inconspicuous, so the effect is that of a solid mass of flowers, making a narrow ribbon of color around a flower border. Pkt., 15c; 2 for 25c, postpaid.

CALENDULA

CALENDULA CHRYSANTHA OR SUNSHINE. Chrysantha is a new Calendula which is outstanding among all varieties known up to the present time. Many improvements have been made on Calendulas, but no other origination can begin to compare with this lively new-comer from far-off Australia. The large flowers are an exquisite shade of clear buttercup yellow, with long loosely arranged petals, which droop to give the rounded appearance found in our favorite Chrysanthemums. Besides adding a bright golden splash of color to the garden, Chrysantha is a fine cutting variety, with long stiff stems, well adapted to combine with other flowers, such as blue delphinium, in bowls or vases. Pkt., 25c; 5 pkts., \$1.00.

CLARKIA

CLARKIA. The flowers have been described as resembling sprays of flowering almonds, the rose and pink tones are especially attractive. They are very hardy and germinate quickly. They do well in a sandy soil, growing usually about 2 feet high. All colors mixed. Pkt., 10c; 3 pkts., 25c.

ANNUAL CANTERBURY BELLS

ANNUAL CANTERBURY BELLS. Few flowers are more popular in spring garden than Canterbury Bells, and we have always wished we might have them over a longer season. This is now possible, and without waiting a whole year for the first flowers from seed. The new Annual Canterbury Bells make a plant that is loaded with flowers less than five months after the seed is sown, and by making successive plantings all through the early spring we can have these lovely flowers all through the summer and early fall. The colors are the same as in the perennial type, including the various shades of blue, pink, rose and white. Pkt., 25c; 5 pkts., \$1.00, postpaid.

DWARF DAHLIAS

UNWIN'S DWARF HYBRIDS MIXED. Something new, for bedding these miniature early flowering semi-double hybrids have no equal. They attain a height from 18 to 24 inches, with a very wide range of charming colors. They require no stakes and may be planted 18 to 20 inches apart. Pkt., 35c; 3 for \$1.00.

Jackson's Choice Flower Seeds Are From The Foremost Growers in America and Europe

We specialize in flower seeds and list only varieties which have been tried and proven successful in our section of the country. A home can hardly be called a home without some bright colored flowers blooming in the yard, and adding cheer to the surroundings. Flowers, when care is exercised and common sense is used, are not hard to grow, and every home, every farm and every park should abound in them, and the school yards should be a source of pride and beauty.

Plant shrubs, but don't plant all shrubs and no flowers as so many do, as you need bright flowers for a contrast in color.

One thing should be borne in mind: flower seeds should never be planted in a cold, wet ground, as they are delicate and will not readily germinate in adverse weather conditions. They should never be planted deep and the ground should be thoroughly prepared. A little care and attention will work wonders in a flower garden.

Bermuda Onion Plants

The usual manner of growing green Onions has, in the past, been by planting sets, but various tests have been proven that the Onion plant is preferable. The set has to be absorbed by the new growth before it begins to form the new Onion, whereas the plant begins to grow as soon as it is planted and makes more headway than the set, producing delicious young Onions for table use during the winter and spring. Onions grown from plants are larger and do not run to seed in the spring like sets. Onions like rich soil, so the ground should be liberally fertilized. Plant in rows about 15 inches apart and 3 or 4 inches apart in the row. 100 for 25c; 200 for 45c; 600 for \$1.00; 1,000 for \$1.50; crate of 6,000 for \$5.00, all postpaid to you.

Sprinkling of the seedling beds with Semesan solution effectively prevents damping-off. Recommended especially for seeds, bulbs, gladiolus corms, dahlia tubers, and rose bushes. Hints for Making and Caring for Lawns

Houston is noted for its beautiful lawns, and so few people appreciate that a winter lawn can be made to look as attractive as a summer lawn, and be green the entire winter. So do not let another winter go by with that old, dead grass on your lawn. English Rye and Italian Rye are good winter grasses and stay green all through the winter.

JACKSON'S WINTER GRASS (Domestic Rye). This is the foremost winter grass and the foundation of all winter lawn mixtures, and we know of no better grass for winter lawn. Should not be planted until the weather is cool, as it will not germinate in the hot months. Plant seed using one pound to a space 10 by 15 feet. It is easy to grow and makes one of the most wonderful lawns with that beautiful green, velvety cast, such a contrast to other vegetation that is dead for the winter, which surrounds most lawns. The seed should be broadcast, following same with thin coating of dirt, then wetting it down, and in a few days the seed will begin to germinate. Just for your own satisfaction, seed your lawn down this winter in Winter Grass. 1 lb. 25c; 3 lbs. 70c; 10 lbs. \$2.00; 25 lbs. \$3.75, postpaid. Not prepaid, 50 lbs. \$5.50; 100 lbs. \$10.00.

RED TOP. This variety of Winter Grass has been used in the North for years, and until recently it was never planted in Texas, but is now a very popular Winter Grass. It is used extensively in mixtures and on most all golf links. A fine variety for shady places. A mixture of English Rye and Red Top makes the best winter lawn mixture you can buy. Use at the rate of one pound to a space 10 by 25 feet. Lb. 75c; 5 lbs. \$3.50; 10 lbs. \$6.00, postpaid. Write for prices in larger quantities.

WHITE CLOVER. Also called "White Dutch Clover". This is the small, low-growing Clover that is so much desired for lawns; nothing is more beautiful than a little White Clover dotting a beautiful green lawn here and there. Used extensively in lawn mixtures. Lb. 75c; 5 lbs. \$3.00, postpaid.

JACKSON'S LAWN GRASS MIXTURE. This special mixture produces a beautiful and permanent lawn. It is made from our own formula and composed of grasses which are adapted to the purpose of producing a turf which retains its rich green color and velvety appearance throughout a long season. Lb. 75c; 5 lbs. \$3.25, postpaid.

CARPET GRASS. Sometimes called Australian Bermuda. Excellent for lawns as it is a perennial, spreading by creeping stems with root at every joint, thus forming a close, compact turf. Seed very scarce on account of crop being short. Lb. 50c; 5 lbs. \$2.25; 10 lbs. \$4.00, postpaid.

KENTUCKY BLUE GRASS. Suitable in some places in Texas and very desirable for sowing under trees. Lb. 60c; 5 lbs. 55c lb.; 10 lbs. 50c lb., postpaid.

BERMUDA GRASS. This variety is strictly a hot weather grass and is the only kind that will withstand the hot sun in the summer time. Often people are under the impression that Bermuda Grass seed is mixed with weed seed, as they have gotten weeds, nut grass, etc., in their lawn after sowing the Bermuda seed, but such is not the case. Bermuda seed is tested for purity and is usually free from weed seed, and the weeds, etc., that come up in the lawn are from fillings or applying new dirt to the lawn, and by gradually working the weeds and foreign matter out, and allowing the Bermuda to grow, they will in time be choked out and you will get a permanent Bermuda lawn. Sow in the spring of the year, when the ground becomes warm or any time in the summer, using one pound of seed to a space 10 by 40 feet. A beautiful green lawn can be obtained from the seed much cheaper than by sodding. Landscape men and those who have charge of golf links appreciate this and have almost entirely ceased using sod, as a more even turf can be obtained from the seed than by sodding. The seed will germinate very readily when the weather is warm by sprinkling every day, as plenty of water is necessary. Lb. 50c; 5 lbs. 45c lb.; 10 lbs. 40c lb.; 20 lbs. 35c lb. Write for prices in larger quantities.

NITRATE OF SODA. A little Nitrate of Soda lightly sprinkled over the lawns adds new life to them, and all lawns are like everything else, they occasionally need renovating, and when your lawn needs new life, or you have dead spots in it, use Nitrate of Soda. Lb. 15c; 2 lbs. 25c; 50 lbs. \$2.00; 100 lbs. \$3.75, not prepaid. By express or freight only; cannot be sent through the mail.

BONE MEAL. Ground bone or Bone Meal is very necessary to all lawns; it should be the foundation of lawns. It takes about six months to decay, but when it does, it adds the required life that all lawns need. Lb. 10c; 10 lbs. 60c; 50 lbs. \$1.50; 100 lbs. \$2.50, not prepaid.

VIGORO. To have a velvety green lawn use Vigoro Fertilizer. The balanced fertilizer for your lawn which is clean, odorless, and can be sown by hand. Try a sack and be convinced. 50-lb. sack \$2.50; 100-lb. sack \$4.00, f. o. b. Houston.

GRANULATED PEAT MOSS (horticultural grade). Excellent for top dressing on lawns, fine for flower beds as a mulch, as it keeps out the heat and cold and improves the soil. Small bales \$1.25; large bales \$2.75, not prepaid.
